DISTRICT OFFICE · 3434 COLWELL AVENUE · SUITE 200 · TAMPA, FLORIDA 33614

## MEMORANDUM

**TO:** FishHawk Ranch Residents

**FROM:** CDD Board of Supervisors

**DATE:** February 12, 2014

**RE:** **Community Wide Treatment for Cogon Grass**

---

Residents should be advised the CDD Board of Supervisors for Fishhawk and Fishhawk II have approved an initial treatment plan and one year maintenance agreement with Finn Outdoor for the removal of Cogon grass along the nature trails and in some common areas. Cogon grass is considered to be an invasive weed and can form dense stands resulting in some displacement of native plants that are important to wildlife. This project will commence **March 3, 2014** and continue for at least one year.

Residents can expect to see some large areas of brown grass along trails and in various common areas once the Cogon grass has been treated. The areas treated should return to their natural "green state" after the Cogon grass has died. It will be determined at a later date if the replacement of turf or plants in the affected areas will subsequently be needed.

If you have any questions or comments regarding this memorandum please contact the Resident Services Office at (813) 657-6629.

Sincerely,

Board of Supervisors  
Fishhawk Community Development District
